By my signature above I agree and authorize Valley Energy to charge my account according to my selection(s) above. And, I understand that Valley Energy's general terms and conditions apply. Valley reserves the right to inspect my heating/cooling system prior to coverage. I understand that my plan selection(s) covers a one year period and will automatically renew upon its anniversary unless I notify Valley in writing 30 days in advance of renewal. Please note all plans are subject to Connecticut sales tax. Valley does not give prorated refunds on the unused portion of the service contract. **Automatic delivery is not required to take advantage of this plan(s).**

The Whole House Approach

When you go to see your Doctor, the first thing they do is check your temperature, your blood pressure and your weight. You understand that these are key indicators on how well your body is performing, how well each part is interacting. Well your house needs to be viewed in the same way in order to ensure it is using energy as efficiently as possible and that all the major systems are working together to create a safe, healthy, comfortable home environment.

Where to begin...

Start by getting the professional home energy efficiency advice you need. It all starts with a walk through visit of your home by Valley Energy. The simplest way to begin is to call Valley Energy and ask for our technician to come to your home and perform a My Home Energy Report. This is a great first step and will help you to begin the process of understanding your home's energy performance.

MyHomeEnergyReport™

Get Your Home Assessed

A Valley Energy certified energy specialist will survey and measure different aspects within your home that effect energy use. To get started email: myhomeenergyreport@valleyenergyco.com.

Access Your Report

A Link to your home's energy performance report will be emailed to the account you provided.

Understanding Your Home's Performance

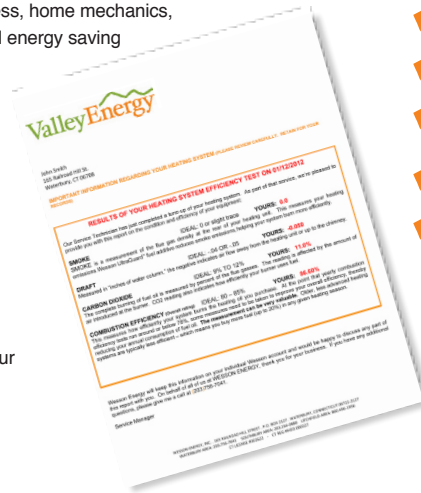

Learn about the efficiency of your home's air/energy tightness, home mechanics, appliances, through easy to understand charts, graphs, and energy saving recommendations specific to your home.

Prioritize Your Improvements

Add items to your "Fix-It" list and work your way to an energy efficient home. The MyHomeEnergyReport™ will help you create a simple and customizable blueprint to saving money and using less energy.

Check in 24/7

Your report never goes away. Check back periodically to remember what steps you need to take. Keep in touch with Valley Energy for deals and assistance in accomplishing your energy Saving plan.

Efficiency Report Card

As a result of the visit, our Valley Energy Technician will either provide you with access to your customized online report or mail you your efficiency report of your whole home's energy performance. Not just the heating system or windows, but your entire home. Your efficiency report card will measure and rate efficiency factors such as smoke, draft, carbon dioxide, and combustion efficiency.

The Benefits of the Visit and Report Are:

- ✓ Overall home rating score
- ✓ A better understanding of the way you currently use energy in your home.
- ✓ Easy to read graphs on the energy efficiency level of over 30 areas of your home
- ✓ Suggestions on how to raise the efficiency levels of your weakest areas
- ✓ A Fixit List, that enables you to customize the work you want to complete, at your pace and on your budget
- ✓ Seamlessly communicate with Valley when you are ready to move onto any of your projects
- ✓ A library of information that will help you to understand how all these areas of your home are connected
